PROFESSIONAL SUMMARY

Hello, I'm Satish Verma, a Cloud Engineer with a deep passion for harnessing the power of cloud technology. I thrive on translating complex technical solutions into real-world business success. I'm committed to innovation and excellence. Let's transform challenges into opportunities in the ever-evolving cloud landscape.

EXPERIENCE

First Digit Media Cloud Engineer

March 2022 - Present

- Configure and maintain infrastructure on AWS and Azure cloud platforms.
 - Create Azure IaaS infrastructure, including VMs, and deploy **Virtual Networks** and **Load Balancers**.
 - Implement Domain Controllers, configure Disaster Recovery with Traffic Manager Profiles, and manage backups.
 - Manage performance by monitoring and optimizing systems to achieve peak performance levels. Provide reports to support metric collection.
 - Implement private endpoints between Azure Services and Virtual Networks, as well as other services.
 - Participate in information-gathering calls and actively contribute to preparing bills of materials and deploying projects.
 - Develop comprehensive disaster recovery plans to ensure business continuity.
 - Lead migration efforts from on-premise environments to Azure cloud using Azure Migrate.
 - Design and create dashboards for clients, offering insights into cloud infrastructure and services.
 - Work on both Infrastructure as a Service (IaaS) and Platform as a Service (PaaS) solutions.
-

SKILLS

- Microsoft Azure Compute Services (IaaS)
 - AWS Cloud Services
 - Azure App Services (PaaS)
 - Virtual Machine, Storage account & Virtual Network
 - Git, GitHub, Version Control, Windows & Linux
 - Azure Active Directory, Load Balancer & Azure DNS, VPN Gateway, Backups & Azure Monitor
-

CERTIFICATIONS

Azure Administrator Associate-(AZ-104) [Cerdly-Link](#)

May, 2023

- Azure Administration: Skills in managing Azure subscriptions, resources, and resource groups. Azure Networking: Proficiency in configuring and securing Azure networking resources.
- Azure Compute: Ability to create and manage Azure VMs, App Service, and other computing resources. Azure Storage: Competency in configuring and managing Azure Storage solutions.

Azure Fundamentals-(AZ-900) [Cerdly-Link](#)

Aug, 2022

- Azure Services: Learned about various Azure services, including compute, storage, networking, and databases. Understanding what each service does and how it can be used is crucial.
-

EDUCATION

Makhanlal Chaturvedi National University 2021

2020 -

Diploma in Computer Application

Jiwaji University

2016 - 2019

Bachelor of Science - Biotechnology
